### DETAILED ACTION

Responsive to communications entered 1/20/2010. Claims 169-175 are pending.

The following election of species has been necessitated by applicant's amendment to the claims entered 1/20/2010.

#### ***Markush Group Member Election***

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Each **genus** identified below is indicated in **bold**. Applicant is required to elect one species from within each genus.

(From claims 169-172) Applicant is to elect a single **nicotine-pseudomonas exotoxin conjugate** specified as to atom and bond. Currently claims 169-172 are generic.

(From claims 173-175) Applicant is to elect a single **adjuvant** selected from the group consisting of: R1B1, aluminum hydroxide and aluminum phosphate. Currently claims 169-172, 173-175 are generic.

The Markush group members are independent and/or distinct because the members have distinct and/or independent chemical, physical, and biological features and functions that are mutually exclusive and therefore are not considered obvious variants of each other.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different fields of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of a specific Markush group member may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the Markush group member(s) are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing each to be an obvious variant or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the Markush group member unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional Markush Group members which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHRISTOPHER M. GROSS whose telephone number is (571)272-4446. The examiner can normally be reached on M-F 9:30-6:00.
